
Noncompliance Notification

S5. E. Reporting and Recordkeeping
Requirements. Page 31

In the event the Permittee is unable to comply with any of the terms and conditions of this permit that could result in the discharge of pollutants in a SIGNIFICANT AMOUNT, the Permittee shall:

The Permittee shall:

- Immediately take action to minimize potential contamination or otherwise stop the noncompliance and correct the problem.
 - Immediately notify the appropriate Ecology regional office of failure to comply.
 - Submit a detailed written report to Ecology within 30 days unless Ecology requests and earlier submission.
-

Significant Amount

Means an amount of a pollutant in a discharge that is amenable to available and reasonable methods of prevention or treatment; or an amount of a pollutant that has a reasonable potential to cause a violation of surface or ground water quality or sediment management standards.

Immediately - Defined

- If you are have a discharge of pollutants, stop the discharge and then call.
- If you find a problem that has the potential to cause a discharge, call as soon as you have identified the problem.
- By law, immediately means within 24 hours except for oil spill.

Why should you Report Non-compliance?

- To get Ecology's expertise to mitigate the environmental damage.
 - To get technical assistance to correct the cause of the problem and avoid them in the future.
 - Reporting and mitigating the problem is considered when determining possible enforcement actions.
 - Because it is required in your permit.
-
